Dear Hiring Manager,

I came across your posting on Indeed.com for data scientist/analyst position, which caught my eye. As a data analyst with over 6 year' of experience and diverse skills, I will be an exceptional candidate for this position and will be a great asset to the Company.

During my graduate school, I acquired two years of practical experience on analyzing satellite imagery data by developing algorithms using R-programming language and other tools. Over the last four years, I continued to work on analyzing drilling data for pore pressure prediction, which helped our clients to have a better understanding of the drilling conditions and make a better decision. Recently, I have pursued the **Data Science specialization program of Johns Hopkins University** which covers **Data Scientist's Toolbox, R programming, Getting and Cleaning Data, Exploratory Data Analysis, Reproducible Research, Statistical Inference, Regression Models and Practical Machine Learning** courses. Moreover, I have completed **6 months of data science bootcamp of Springboard, which covers projects on python, machine learning, data visualization, and inferential statistics**. I have also a practical knowledge in Java, Python and R. I am now seeking a position that will utilize the most of my experience while offering additional opportunities for personal and professional development.

On top of my technical experience and skill, I will offer professional level of communication with good task managerial skill. I will also work tirelessly to take the department to the highest level while being part of the team.

Please refer my attached resume for detailed information on my accomplishments and qualifications. I look forward to hear from you.

Sincerely,

Benhur B. Tedros
